SOFTWARE ENGINEERING CO-OP STUDENT

Software Engineering Co-op Student focused on backend development, building full-stack systems and real-time applications.

SKILLS

Languages: Python, JavaScript (TypeScript), Java, C++

Frameworks: Node.js, React, Flask

Cloud & Tools: Azure (Blob Storage), Docker, Git, Linux

Databases & APIs: PostgreSQL, MongoDB, REST APIs, JWT Auth

WORK EXPERIENCE

Software Engineer Intern

Jan 2026 – Present

Allpac Containers Inc., Windsor, Ontario

- Built a full-stack ERP system (React, Node.js, PostgreSQL, Prisma) for inventory, production, and warehouse workflows
- Designed backend APIs and core system logic for transactions, work orders, and role-based data validation

Teaching Assistant

Sep 2024 – Dec 2025

University of Windsor, Windsor, Ontario

- Guided students through C labs, debugging code live and grading assignments

PROJECTS

Cloud Storage Platform - Azure-Based File System

Azure Blob Storage · React · Node.js · REST APIs

- Built a cloud storage system using Azure Blob Storage with file upload/download and metadata support
- Developed REST APIs (Node.js) for file operations with user-based authentication and access control
- Designed architecture for multi-device access (web, desktop, mobile)

Sentinel FieldView - Real-Time Multi-Device System

C# · .NET · WinUI 3 · Kotlin · UDP

- Built a real-time multi-device system for synchronized overlays using a custom UDP networking protocol
- Designed an authoritative relay architecture to maintain consistency under packet loss

EDUCATION

Bachelor of Computer Science Honours

2023-Present

University of Windsor

- Dean's List

Coursework: Software Development, Software Engineering, Databases
