SKILLS

Languages: Python, JavaScript (TypeScript), Java, C++

Frameworks: Node.js, React, Flask

Cloud & Tools: Azure (Blob Storage), Docker, Git, Linux

Databases & APIs: PostgreSQL, MongoDB, REST APIs, JWT Auth

EDUCATION

Bachelor of Computer Science Honours (CO-OP)

September 2023 - Present

University of Windsor

- Dean's List
- Coursework: Software Development, Software Engineering, Databases

WORK EXPERIENCE

Software Engineer Intern

Jan 2026 - Present

Allpac Containers Inc., Windsor, Ontario

- Developed a full-stack ERP system (React, Node.js, PostgreSQL, Prisma) supporting inventory, production, and warehouse workflows across multiple departments
- Built backend APIs, reporting tools, and validation systems for 10+ operational workflows, improving inventory tracking and reducing manual data handling

Teaching Assistant

Sep 2024 - Dec 2025

University of Windsor, Windsor, Ontario

- Guided students through C labs, debugging code live and grading assignments

PROJECTS

Cloud Storage Platform

Azure Blob Storage · React · Node.js · REST APIs

- Developed a cloud storage platform using Azure Blob Storage with secure file upload/download and metadata management support
- Built REST APIs and authentication systems for multi-user access control across web and desktop clients
- Designed scalable architecture for multi-device access and cloud-based file management

Sentinel FieldView - Real-Time Synchronization System

C# · .NET · WinUI 3 · Kotlin · UDP

- Developed a real-time multi-device synchronization system using custom UDP networking for low-latency overlay updates
- Designed an authoritative relay architecture to maintain system consistency under packet loss and unstable network conditions
